I'm a curious developer who enjoys building fun stuff. I like understanding how systems work under the hood. I'm driven by curiosity — whether it's learning a new framework, debugging something tricky, or exploring. I'm always looking to grow and create something cool.

Projects

PicGen | AI Image Generator -

- Built a full-stack web application that generates AI images from text prompts using **React**, **Express.js**, **PostgreSQL** and **Tailwind CSS**
- Integrated **Freepik's API** for image generation and **Cloudinary** for secure image storage.
- Implemented **user authentication** with **Clerk** and managed data using **Prisma ORM**.
- Deployed and containerized the app using **Docker** for production-ready setup.
- [Live Link](#) | [Github](#)

Pulse | Real-Time Chat Application

- Developed a real-time chat app with **React**, **TypeScript**, **Node.js**, **Socket.io** and **PostgreSQL**
- Implemented **secure authentication** using **Clerk** and managed data with **Prisma ORM**.
- Supports **group chats**, **user search**, and **real-time messaging** with efficient Websocket .
- Built a **responsive, modern UI** with **Tailwind CSS** and optimized for desktop.
- [Live Link](#) | [Github](#)

Key Skills

- ♦ **React**
- ♦ **Node**
- ♦ **TypeScript**
- ♦ **PostGres**
- ♦ **Docker**
- ♦ **Express**

Certifications

Full Stack and Devops course

October 2025

100xDevs
